HSP Compatible

We are searching for interested OEM clients NOW!

Our patent pending kcAudio Stereo+Intercom system provides wireless stereo with a live intercom back channel for a true, all wireless stereo headset. Additionally kcAudio firmware provides low-latency algorithms that reduce standard Bluetooth audio lag by over 400%, suitable for gaming and video applications. Our Stereo+Intercom Bluetooth headset is also fully compatible with standard Bluetooth A2DP profile for receiving stereo and HFP profile for receiving cell phone calls.

Highly customized Bluetooth firmware and chipset solution. Complete hardware solutions or licensing available.
